Product for Evaluation Panel Study: Bausch + Lomb Ultra for Astigmatism

Number of Evaluators Needed: 50 participants

Timing: 30 patients on eye study, completed in a 90-day period

Start Date: November 15, 2017

Patient Type: Astigmatic patient. New to product

Study Structure:

- Doctor-specific URL will be emailed to participants. URL will allow an “application” link to be downloaded to homepage of a mobile device. Study will be completed electronically, per patient, using computer or mobile device
- Doctor will be expected to fill out a simple interactive survey of 9 questions per patient. Fit, stability, vision, comfort will be examined during the patient visit
- Doctors are required to assess initial fit for each patient, document results within the survey application
- Results will be compiled per location, and doctors will receive access through a practice-specific URL to their own study results, in real time

Final Results and Recognition:

Final results of the study will be aggregated and assessed 30 days after the close of the study. Results will be compiled and sent to ALLDocs members through an e-blast and will remain on the ALLDocs website for a few months

A certificate of completion will be mailed with compensation, and each participating doctor will be recognized by name and practice name in the study.

Incentive from ALLDocs: \$10 per patient survey completed, up to 20 patients, \$15 per patient after 20 patients, to max at 30 patients. Max total compensation for study completion: \$350. Checks will be mailed from ALLDocs to location of practice after study is closed
